

“Spirit of Enderby” uses **Chornco 2082** to protect wilderness waters and reduce fuel consumption over 20%

Chornco Additives Turn Fuels into Cost Effective Sustainability Tools That Pay.

Heritage Expeditions operates the former polar research vessel “Spirit of Enderby” for eco-tourism voyages from Arctic to Antarctic waters. Comparisons of year to year bunker records revealed fuel savings over 20% in the first year of using Chornco 2082. Additional key benefits were elimination of black exhaust smoke and maintenance costs reduced by over NZ\$30,000.
